

RHINOZ Armour Texture

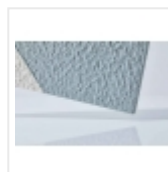

Commercially Available Large Volume

Blue Label Co., Ltd. 

MC 1024704

POLYMERS

A two-in-one paint solution that combines beauty and waterproof durability. This decorative textured paint provides a unique finish for wall and ceiling applications. The composition is 100% acrylic-based and can easily be applied to flat surfaces using a roller or brush. This paint is manufactured in a standard mixing machine that is closely monitored by a quality control team. The solution contains biocides that resist the growth of mold or mildew, ensuring long durability and weather-resistant properties. This textured paint can be used over a variety of common building materials such as plaster, concrete, fiber cement, gypsum board, etc. It can be used for interiors or exteriors, and the textured pattern can be customized during the application process. For large orders, the paint can be customized in color. Applications include residential interior and exterior walls and ceilings.

When contacting the manufacturer, please be sure to reference the material's name, and not the MC Number.
