

RHINOZ Venetian Loft

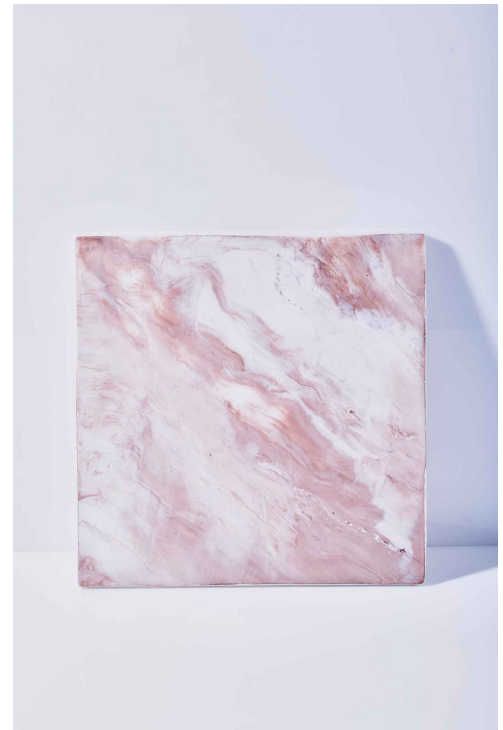

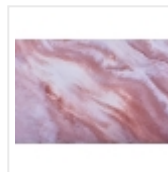

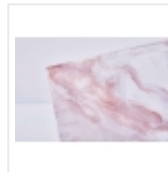

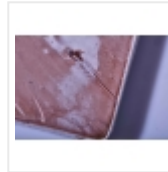

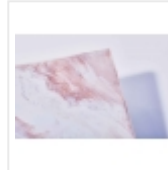

Commercially Available

Blue Label Co., Ltd. 

MC 1024703

CEMENT-BASED

Durable, decorative acrylic-based plaster for vertical surfaces, creating a concrete finish with an extra smooth touch that can also mock a natural marble pattern. 100% acrylic polymer is used with pigmentation to create distinctive aesthetics. The surface is applied by hand trowel and cures to a very smooth surface. Containing 'BioCleanAct' the formulation helps prevent the growth of microbial substances. It is weather-resistant, crack-resistant, chalk-free and dust-free. There are over 12 choices of colors. With its special formulation, it also can create a natural marble stone pattern when mixing 2 or more colors. The product allows for customization of pattern, texture, and surface effect, and can mimic the look of highly polished concrete with a smooth finish. Applications are for commercial and residential interior surfaces.

When contacting the manufacturer, please be sure to reference the material's name, and not the MC Number.
