

## RHINOZ Metallic Loft

Commercially Available

Blue Label Co., Ltd. 

MC 1024702

### POLYMERS

Decorative acrylic-based plaster used to create a polished concrete look on vertical surfaces. This 100% acrylic polymer incorporates color and special effects, such as pearl and metallic, to provide unique patterns and aesthetics on interior walls. The mixture is ready-to-use and is troweled on to allow for customized patterning. The plaster contains a 'BioCleanAct' chemical that helps prevent the growth of microbial substances. The finished surface is weather-resistant, crack-resistant, chalk-free and dust-free. Applications are for interior residential walls and ceilings.

When contacting the manufacturer, please be sure to reference the material's name, and not the MC Number.
